Finiture di pregio realizzate con gli stessi trattamenti galvanici impiegati dall'alta gioielleria, per questo necessitano di particolari attenzioni già durante il montaggio e una costante pulizia quotidiana. Per la manutenzione è necessario evitare depositi d'acqua e di conseguenza calcare mariniando con frequenza acetate le superfici con un panno morbido, per la pulizia solo acqua e sapone a pH neutro. / Fine finishes made using the same galvanic treatments used for luxury jewelry. As such, they require special care even during assembly stages, and consistent daily cleaning. For maintenance, it is necessary to avoid water deposits and consequently limescale, frequently drying the surfaces with a soft cloth, only water and pH neutral soap are suitable for cleaning.
